

Product Information

444 ADHESIVE SPRAY

Web Spray Pattern for Foam-to-Foam ...Permanent Bond for Foam-to-Foam

444 Adhesive Spray is a clear adhesive spray that is formulated for foam-to-foam and foam-to fabric applications. Unlike conventional adhesive sprays, 444 Adhesive Spray possesses a web-spray pattern that is ideal for porous and rough surfaces like **polyurethane foam**. Apply to one side for pressure sensitive tack, or to both sides for permanent bond. It tacks immediately and imparts a seamless bond-line with tear-away strength.

Clearco 444 Adhesive Spray Does Not contain Chlorinated Solvents or Ozone Depleting Chemicals; it meets California VOC requirements, 2002, the strictest environmental requirements in the United States

Features

- Best Foam to Foam Adhesive Spray on the Market
- Web Spray Pattern
- Immediate tack
- Tear away strength adhesive bond
- Seamless Bond-Line
- Non-clogging spray system
- 2002 California VOC Compliant
- No CFC's
- Quick Drying

Formulated for Foam-to-Foam & Foam- to-Fabric applications.

Net Wt. 12 oz. (340 grams)

Specifications

Appearance	Whitish Color
Can Size	20 oz. (17.5 fl. oz.)
Net Wt.	12 oz.
Packing	12x12 oz. net wt. cans per case
Spray Pattern	Web
Bond	Permanent/Temporary

Packaging

1-case.....	12 x 12oz net wt. cans
-------------	------------------------

** For 54-case (1/2 skid) & 108-case (1-skid) quantities, please Contact us for Pricing Supports.*

Applications

Foam To Foam:

To Bond Foam to Foam, spray both sides of Foam. Clearco 444 becomes Tacky in Seconds, and pieces can be joined almost immediately. This provides a Permanent Bond that is ideal for building layers of foam or to attach edges together for continuous feed.

Foam To Fabric:

*For quick pressure sensitive bond, spray foam and lay material on top. This holds material in place and prevents shifting. Clearco 444 is a high solids adhesive that **has Low Soak-in and Will Not Bleed through the Material.***
