AM-6152 Amino-Functional Silicone Fluid

AM-6152 is an Amino Functional Silicone Fluid (CAS# 67923-07-3) with a low level amine number of 7ml. The fluid is non-volatile, clear to hazy with a nominal viscosity of 300cSt @ 25°C.

AM-6152 Amino-Functional Silicone Fluid is most widely used as a release agent for urethane foam and as a cable lubricant in the automotive industry. It can be used as a straight fluid or diluted with a conventional solvent. AM-6152 will provide more releases with fewer applications than conventional silicone fluids.

Properties:
Appearance.........................clear to slightly hazy
Nominal viscosity.................300cSt @ 25°C
Flash point..........................>100°C
Boiling Point.........................>148°C
Percent volatile....................<2% (See certificate of analysis for exact % volatile content)
Specific gravity: 0.97 @ 25°C
