### SECTION VIII - SPILL AND DISPOSAL PROCEDURES

**Spill Response**.....Spills from aerosol cans are unlikely and are generally of small volume. Spill prevention is therefore not normally considered a problem. In case of actual spill or rupture, avoid breathing vapors and ventilate area well. Remove all sources of ignition and use non-sparking equipment. Soak up material with inert absorbants and place in safety containers for proper disposal.

**Waste Disposal Method**.....Clean-Up action should be carefully planned and executed. Shipment, storage, and/or disposal of waste materials are regulated and action to handle these materials must meet the applicable rules. If any question exists, the appropriate agencies should be contacted to assure proper compliance. **DO NOT INCINERATE AEROSOL CAN!**
