

Product Information

ClearSlip #2 Rubber & Plastic Lubricant

Formulation: Silicone dispersed in an odorless solvent...more cost-effective than aerosol

Formulated with Silicone to lubricate plastic and rubber parts

ClearSlip #2 Rubber & Plastic Lubricant is formulation of silicone that is dispersed in an odorless solvent to lubricate a wide range of plastic and rubber parts. The fluid is clear, colorless and odorless with a viscosity of water. The solvent acts as a carrier to impart a light film of silicone on the surface to which it is applied. The silicone film reduces the coefficient of friction between plastic and rubber parts, thus proving excellent lubricity and extended service life to the applied parts.

For lubricating plastic and rubber parts/components, there is no better choice than a silicone-based product. The active ingredient of ClearSlip# 2 is Polydimethylsiloxane, which is composed of 100% synthetic material.

Unlike conventional petroleum and glycol-based products, silicone fluids are compatible with virtually all plastic and rubber materials including EPDM, Neoprene, Natural Rubber, Teflon, virgin, Butyl, Nitrile, Styrene Butadiene, Buna-N, PVC, LDPE, HDPE.

Although silicones are not recommended for metal-to-metal applications, they are strongly recommended for metal-to-plastic and metal-to-rubber applications.

Compare **ClearSlip #2 Silicone Lubricant** with any aerosol silicone spray. It will do a better job, and cut your Silicone Costs by 50% or more.

Note: ClearSlip #2 Silicone Lubricant should not be used for applications near an open flame or heat source

Specifications

Product Code	CS#2
Appearance	Clear, odorless fluid
Availability	5-gallon cube or pail 55-gallon drum
Weight	6.5 lbs. per gallon
Solubility	Oil Soluble: will not mix with water
Flammability	HMIS Rating 2
Active Ingredients	Pure Dimethyl Silicone Fluid Does not contain Chlorinated Solvents

Uses Include:

- Rubber parts lubricant
- Plastic parts lubricant
- O-ring lubricant
- Gasket lubricant
- Rubber assembly lubricant
- Gasket lubricant
- Grommet lubricant
- Hose lubricant
- Rubber tube lubricant
- Rubber fastener lubricant
- EPMD lubricant
- Buna-n lubricant
- Nitrile lubricant
- HDPE lubricant

Properties:

- Silicone fluid dispersed in an odorless solvent
- Imparts a light film of silicone on surface to provide lubricity
- Clear, colorless, odorless fluid
- Ready-to-use...no mixing required
- Easily applied via hand sprayer / power sprayer
- Safe on virtually all surfaces including plastics, vinyls, rubbers, and foams.
- Will not freeze in cold weather
- Hydrophobic

Environmental Specifications:

- Contains no CFC's or ozone depleting chemicals
- Contains no hexane
- Contains no acetone
- RoHS compliant

Packaging

5-gallon cube.....	18.9 liters
55-gallon drum.....	208 liters
FOB Phila, PA USA
